

## Leighton O'Brien and AlterEco partner to expand business in Spain

**LOB's e leak detection and wetstock intelligence will integrate in AlterEco's Spanish portfolio.**

Leighton O'Brien, a fuel analytics technology provider, and AlterEco, a provider of integrated services for fuel retailers, have announced a new Licensed Software Partnership that will deliver the leading EPA-certified wetstock management solution to the Spanish market.

Leighton O'Brien's Wetstock Live software will integrate with AlterEco's EcoManager platform, bringing the leak detection and wetstock intelligence to AlterEco customers.

"Wetstock Live will enable our customers to achieve the highest compliance given its SIR certification is among the most accurate in release detection, with a leak detection threshold of 4.5 litres per day," said Gustavo Mezquita, founder and CEO at AlterEco.

"We are already monitoring more than 175 retail fuel sites in Spain with Wetstock Live," he said.

"We're confident we can capitalise on further significant market opportunities with a proven, certified solution that identifies true fuel losses and other issues in real-time.

Leighton O'Brien Global President of Wetstock, Greg Salverson said: "We're very excited about the opportunities this partnership brings. AlterEco is a leader in their market, with a highly capable, trusted and responsive team to support our best-in-class wetstock solution."
