

## OTI partners with Puma Energy to improve payment solutions in Southern Africa

**Together they launch a new payment solution for Puma Energy's sites in Namibia and Botswana.**

On Track Innovations Ltd. (OTI), a global provider of NFC and cashless payment solutions, has partnered with Puma Energy in Namibia and Botswana, launching a solution based on OTI's innovative AVI EasyFuelPlus solution.

Puma Energy also welcomes customers who are contracted to Masana Petroleum, BP's commercial arm in the region, to Puma stations in Namibia and Botswana for all their cross border refueling requirements.

"We are excited to launch this innovative solution to our customers in Africa and look forward to it becoming part of our global offer," said Sidy Bane Puma Energy's Chief Operating Officer, Africa.

OTI expects to generate increasing revenues from this solution as Puma's footprint grows and transaction volumes increase.

Puma Namibia recently, embarked on a program to more than double its footprint of service stations offering this service.
