

## ryd pay to be integrated into Tokheim cashier systems

**The cooperation will enable pan-European in-app payment at the gas station in the future.**

The ryd pay interface will be integrated into Tokheim's cash register systems and filling pumps via the MobyPay cloud platform. The cooperation will enable pan-European in-app payment at the gas station in the future. Making the ryd pay integration for petrol station operators very simple and quick to implement.

Tokheim Service Group is a company operating in Europe and Africa and is the leading service and installation partner for gas stations. With the MobyPay cloud platform developed by TSG, their goal is to enable mobile transactions on a variety of systems. The integration of ryd pay with Tokheim POS systems will make it easier for petrol station operators to access mobile in-app payment.

"We want to enable mobile payments for our petrol station customers with their total of 1.500 installed systems in Germany. As an innovative driver of the mobility industry, we are looking forward to accelerating the digitization of the gas station", says Fabian Pricl, Head of Systems & Fleet at TSG in Germany.

"By connecting to the MobyPay cloud platform from Tokheim, ryd pay can be used at over 2.400 gas stations in Germany, Austria and Switzerland. Our partners and customers in Belgium, the Netherlands and Luxembourg also benefit from the smart payment method at the petrol station", says Oliver Götz, founder and executive chairman of ThinxNet GmbH.
