

Spain: Grupo HAM opens CNG/LNG station in Albacete

With the opening of this new site in Castilla-La Mancha, Grupo HAM operates 47 CNG and/or LNG stations located in Spain and Europe.

Grupo HAM has opened in collaboration with Transportes Ojechar a refueling station for compressed natural gas and liquefied natural gas, in La Roda, province of Albacete. The gas station is located a few minutes from the A-31 highway, in a strategic point connecting the center and the east of the Iberian Peninsula.

Transportes Ojechar, a company dedicated to logistics and transport, has decided to invest on CNG and LNG fuels with the aim of reducing CO2 emissions.

The HAM station is equipped with an LNG pump, for trucks and heavy vehicles, and a CNG pump, for cars, light vehicles and trucks. The opening hours are 24/7, with free access for all customers. Self-employed and companies can benefit from the advantages of the HAM card for businesses.

With the opening of this new refueling station in Castilla-La Mancha, Grupo HAM currently operates 47

gas stations refueling CNG and/or LNG, located in various parts of Spain and Europe.

Grupo HAM, a leading company in the natural gas vehicles (NGV segment), continues its efforts to roll out new refueling stations for compressed natural gas and liquefied natural gas.
