

Spain: Grupo HAM opens new CNG-LNG station in Girona

HAM operates over 70 gas fillings stations located in Spain and in the main European transport corridors.

Grupo HAM, through its company HAM Criogénica, has opened a new CNG-GNL refuelling station in Girona, Catalonia. The new site is located in the facilities of Petrem Trucks, a company from Empordà that sells fuel, oil and lubricants.

The refueling station has a vertical tank of 98m³, 2 single-hose LNG dispensers for refueling trucks and heavy-duty vehicles, and 2 double-hose CNG dispensers for refueling cars, light-duty vehicles and trucks.

According to Grupo HAM's press release, the gas station could be expanded in the future to a maximum of 4 dispensers for refueling LNG (2 double + 2 single) and a maximum of 6 dispensers for refueling CNG (4 double + 2 single). The gas filling station is open 24 hours / 7 days a week, and is freely accessible to all customers, who can pay with any credit and/or debit card.

HAM Criogénica is a leading company in the LNG sector integrated in Grupo HAM. The company has developed more than 300 projects worldwide, both in the design and construction of facilities for all types of industries and the naval sector.
