

Morrison Introduces New 10-Gallon Remote Fill Box

The Morrison 715 Series is a 10 gallon capacity remote fill box that provides containment of small spills during tank filling operations. All models are supplied with a male threaded connection inside and outside. The 715 may be ordered with a factory installed ball valve and a choice between a female quick disconnect check valve coupler with dust plug, or a dry disconnect adaptor and cap. Stainless steel models also available.

Features

- Rugged 14 gauge steel construction
- Tank/wall mounting brackets standard
- Vapor recovery bracket standard
- Sloped bottom with drain plug and hand pump return for easy maintenance
- Vented, weather-proof, and pad-lockable
- Integral grounding stud
- Factory-installed valve and coupling packages available in 2" or 3" sizes

Options Available

- 14 gauge powder coated steel or 304 stainless steel construction
- Brass or stainless steel ball valve
- 90 aluminum female quick disconnect check valve with dust plug or dry disconnect adaptor and cap
- EVR approved vapor recovery kit
- Post mount kit

- Fill box can be purchased separately
