

## Engie opens new CNG/LNG filling station in France

**Hauconcourt location is the third station commissioned to Engie Solutions under the Connect2LNG programme.**

Engie Solutions has opened a new CNG/LNG filling station located in Hauconcourt, France. Partly financed by the European Union, the site is part of the Connect2LNG programme, an initiative subsidising the establishment of a network of natural gas stations across France and Germany.

Following the openings of Sorigny, in March, and Roye, in June, Hauconcourt is the third station commissioned to Engie Solutions under the Connect2LNG programme.

Hauconcourt station will accept credit card payments, as well as the badge system reserved for professionals.
