

Hydrogen filling infrastructure expands in the Netherlands

AECOM, Nel Hydrogen and Antea Group are partnering to roll out public hydrogen filling stations at Shell sites.

Shell is partnering with AECOM, Nel Hydrogen and Antea Group to expand the network of hydrogen filling stations in the Netherlands, reports ttm.nl. The partnership agreement establishes the construction of public hydrogen filling stations at Shell sites.

The first hydrogen filling station is already under construction at the Shell station Den Ruygenhoek, next to the A4 motorway near Schiphol Airport. The second location is on the planning state and will open its doors soon at the Shell station Westpoort, near the eponymous exit of the A4 motorway.
