Clean Energy inks deals for over 20 million gallons in past 45 days

Transit agencies, waste disposal companies, and truck fleets sign contracts for renewable natural gas.

Clean Energy Fuels Corp. announced new and extended contracts for more than 20 million gallons of Redeem renewable natural gas (RNG) to accommodate the continued demand across key business segments for the ultra-low carbon fuel produced from organic waste.

Alpha Lion, which carries mail for the U.S. Postal Service between the Northwest United States and Southern California, is adding 16 new natural gas trucks to its fleet through Clean Energy's Zero Now program and is expected to use over 700,000 gallons of Redeem annually.

The City of Anaheim has signed a five-year service agreement for municipal vehicles that will consume an approximate 500,000 gallons of Redeem RNG.

"From waste to transit to trucking, fleets are discovering that RNG is a proven solution that can

significantly decrease the impact of harmful emissions and reduce greenhouse gases,” said Nate Jensen, Clean Energy’s Senior Vice President, Renewables Fuels. “RNG offers price stability, lowers maintenance costs, and can reduce carbon emissions 70 percent or more, providing a clean and cost-effective alternative to diesel fuel.”

Clean Energy also signed a new agreement to operate and maintain the City of Phoenix transit bus facilities, which dispense an estimated 4.8 million gallons of natural gas per year.
