

## Netherlands: Plans unveiled for a new hydrogen filling station for buses

**Nel Hydrogen Fueling was commissioned by Everfuel for the development of the new site, which is scheduled to be operational by end of 2021.**

Nel Hydrogen Fueling, a subsidiary of Nel ASA, has received a €1.6 million purchase order from Everfuel for the development of a new hydrogen filling station for zero emission buses in the Netherlands.

The new hydrogen station is scheduled to be operational by end of 2021.

Nel Hydrogen Fueling will deploy in the Netherlands its latest generation H2Station fueling solution, which is developed for fast refueling of heavy-duty vehicles, such as buses and trucks.

"We're proud to support Everfuel in succeeding with their ambitions of making green hydrogen affordable and widely available across Europe," says Jens Egholt, Senior Director Global Sales of Nel Hydrogen Fueling.
