

Nel ASA to install hydrogen stations in Poland

The value of the order from ZE PAK is around €3.2 million, and the stations for passengers cars and buses are scheduled to be delivered in 2021.

Nel Hydrogen Fueling, a subsidiary of Nel ASA, has received a purchase order from ZE PAK SA for delivering hydrogen fueling stations for fuel passenger vehicles and buses in Poland.

The value of the purchase order is around EUR 3.2 million, and the stations are scheduled to be delivered in 2021.

"We're excited to enter yet another country in Europe with our H2Station fueling solutions. We see attractive market opportunities in Poland, and are proud that ZE PAK, which is the leading energy company in Poland has chosen our fueling solutions," says Jens Egholt, Senior Director Global Sales of Nel Hydrogen Fueling.
