

## Bennett Pump, Infonet complete EMV Level 3 certification for Harmons Fuel Stops

**Harmons deploys EMV compliant Chip Card and NFC transactions on Bennett Pacific Series dispensers**

Harmons has begun the deployment of EMV chip card compliant payment on Bennett Pacific dispensers utilizing Infonet's C-Store Commander. The level 3 EMV certification was completed on September 10, 2020 on the Fiserv / First Data network. Harmons will roll out EMV chip card payment and contactless NFC (near field communication) at the forecourt across their entire network by year end.

"It was great working with the Harmons and Bennett team on this EMV certification," said Vilson Chalissery, President of Infonet. "This project consisted of developing a custom solution for Harmons to integrate with their loyalty system and also developing a solution to transfer all sales data from each store to their head office system as the sale happens, we're very happy with the end result and level 3 certification".

"Harmons is a well known name in the Mountain West as a high quality grocery store chain with excellent customer service and good value," says James Collier, VP at Bennett Pump Company. "Working with industry experts at Infonet, Harmons has taken their high level of customer service and EMV compliance to the fuel forecourt where they provide easy redemption of their loyalty program benefits "Foodie Club" for instant fuel discounts."
