

## Spain: Endesa installs charging points at Gacosur fuel stations in Andalusia

**The 19 semi-fast and fast recharging points will be rolled out in the Andalusian provinces of Huelva, Seville, Cadiz and Malaga.**

Endesa X will install a total of 19 recharging points for electric vehicles at Gacosur fuel stations located in the provinces of Huelva, Seville, Cadiz and Malaga.

The new recharging points installed will be semi-fast and fast, enabling 80% of an electric vehicle's battery to be charged in between 20 and 90 minutes, depending on the type of charger and the model of the vehicle.

Endesa X already has two semi-fast recharging stations in operation in Seville city. A further two points will be added in the province of Seville, in the municipalities of La Rinconada and Utrera.

In the province of Cadiz, Endesa X and Gacosur are working to complete the installation of 4 rapid and semi-rapid recharging stations. These points will be installed in Palmones, Villamartín, and Jerez de la Frontera.

In Malaga, Endesa will shortly install a fast charging station in the town of Antequera.

Finally, in Huelva, a recharging point was recently added to a Gacosur fuel station in Lepe.

Some of the recharging points are part of the AMBRA-Electrify Europe Project (2017-IT-TM-0110-W), financed by the European Commission's Connecting Europe Facility (CEF Transport) programme and the European Investment Bank (EIB).
