

## France: Proviridis launches new V-Gas multi-energy station

**The new location in Bouches du Rhône is part of Proviridis' plan to install 50 new "green stations" in France within the next five years.**

Proviridis, a supplier of low-carbon multi-energy stations, continues with its expansion plans in France with the inauguration of a new V-Gas multi-energy station at Plan d'Orgon, in the Bouches du Rhône department. The new location adds to the company's recent openings in Chambéry, Puget-sur-Argens, and Saint-Thibault-des-Vignes.

V-Gas Plan d'Orgon will provide customers with natural gas (GNL, GNC, BioGNV), fast electric charging infrastructure, and hydrogen supply.

The site is equipped with five refuelling tracks. It features two LNG dispensers, two CNG dispenser compatible with NGV1 and NGV2 vehicles, and two fast charging points delivering up to 150kW power. The station will open 24 hours a day and accept payments made by credit card and through several corporate fuel cards such as V-Gas, DKV, or UTA.

Green energy power company [Proviridis plans to install 50 new V-Gas multi-energy stations in France](#) within the next five years, following a €19 million financing round supported by the Banque Territoires and the energy fund Demeter. The sites will provide natural, compressed or liquefied gas, hydrogen and fast-charging points for electrical vehicles.
