

Spain: HAM Group launches gas filling station in Burgos

The new site, owned by Beroil, raises HAM Group's network of gas filling stations to a total of 74 locations across Spain and Europe.

HAM Group continues to expand its gas filling network in Spain with the opening of a new compressed natural gas (CNG) and liquefied natural gas (LNG) station in Rubena, Burgos. With this addition, the HAM Group increases its gas filling network to a total of 74 locations throughout Spain and the main European transport routes.

The new station, owned by Beroil, is located on the Madrid-Irun N-1 road, also known as Autovía del Norte. This route connects Madrid with France, making it one of the main communication axes with the north of Spain, along with the rest of Europe.

The Rubena gas station has an underground tank of 80,000 litres of LNG, which works at low pressure (2-3 bar) and has the capacity to supply up to 12,000Kg/h of LNG, and 10,000 kilos of CNG per day. The station has an underground coldbox, "on the fly" conditioning system, two LNG double dispensers

(four hoses) for trucks and heavy-duty vehicles, and a double CNG dispenser (two hoses) for cars, light-duty vehicles and trucks.

Open 24 hours a day, all year round, the location is freely accessible. Customers can pay with any credit or debit card, while companies and self-employed people will be able to use the HAM card for professionals.
