## Romp petrol added 10 fuel stations in Romania this year

**Romp petrol network reaches 30 sites in Romania. New stations will feature an upgraded minimalist image, with a focus on the gastro space at the shop.**

Romp petrol continues expanding its network of fuel stations in Romania and reached 10 new locations opened this year. With its latest opening in Decembrie-IIfov, Rompetrol network currently amounts to 30 fuel stations in the country, according to a company's press release.

The 10 new gas stations are located in Cluj (Vuia, Oradea Clujului, Gheorghieni), Ilfov (Clinceni, December 1), Prahova (DN1 - Campina), Bucharest (Sisesti street), Arges (Curtea de Arges), Valcea (Valea Oltului - Calimanesti) and Craiova (Simnic).

The stations feature AdBlue tanks (5 stations), fast pumps (6), liquefied petroleum gas skid (4), car parking (134 places), truck parking (2 stations - 7 places), and electric charging points (6). At the shop customers will find and a selection of retail convenience products and gastro.

Romp petrol new stations will feature a new concept image characterised by a minimalist format both

at the canopy and the store, and an optimization of the production space for gastro products - the HEI brand. The concept was piloted in the first part of this year at Rompetrol's new station in Bucharest - Sisesti, which became the company's laboratory for new products and services.

The Rompetrol brand is part of the Kazakh-Romanian Energy Investment Fund (FIEKR), established in October 2018 by KMG International with the strategic objective of developing energy projects in Romania. By 2023, FIEKR aims to reach a network of 84 gas stations in Romania through the acquisition and modernization of existing stations, as well as the construction of new stations.
