

## **HAM Group reaches 80 NGV filling stations in Europe**

**Following the opening of a new LNG refueling station in the Community of Madrid, Spain, HAM Group reached milestone.**

Grupo HAM, a leading company in the natural gas vehicles (NGV) sector in Europe, has reached 80 NGV refueling stations active following the opening of a new refueling station in the Community of Madrid, Spain, according to a press release.

Located in the facilities of Transportes Carrasco, in the municipality of Velilla de San Antonio, the new station offers liquefied natural gas (LNG) for trucks and heavy vehicles. The location has an 80m<sup>3</sup> tank with a pressure of 18bar.

It will be freely accessible 24/7, all year round. The station accepts all major debit/credit cards, as well as the HAM card for professionals, available to the self-employed and companies.

HAM Group's network of GNV filling stations includes compressed natural gas and liquefied natural

gas refuelling stations on the main transport routes across Spain and Europe.
