

## Everfuel begins hydrogen fueling in Norway

The delivery of the Hvam station triggers the financial close of the acquisition of the two hydrogen fueling stations and associated distribution assets in Norway from H2CO AS.

Everfuel A/S assumed ownership and operation of the hydrogen fueling station at Hvam, northeast of Oslo, Norway, as the first of two fueling sites acquired in November 2020. The delivery of the Hvam station triggers [the financial close of the acquisition of the two hydrogen fueling stations and associated distribution assets in Norway from H2CO AS](#), an Uno-X owned company.

This is Everfuel's first hydrogen station in Norway and an important step in realizing the company's green hydrogen fueling strategy for trucks, buses and cars connecting the main traffic corridors in Scandinavia, according to Everfuel.

Everfuel is working towards installing the second station at Åsane, near Bergen, in the third quarter, subject to Covid-19 restrictions, final approvals and the seller delivering a fully functional station.

"We are very pleased to start supplying hydrogen for zero emission mobility to our customers in

Norway. The hydrogen stations at Hvam and Åsane are the first of several planned for the Norwegian market and a confirmation our commitment to be at the forefront of the green transition and a leader in connecting safe hydrogen production, distribution and fueling,” says Jacob Krogsgaard, the CEO of Everfuel.
