

## Diebold Nixdorf presents the Storevolution™ at UNITI expo 2022

**You want to transform your fuel retail business from “Fuel plus X” to “X plus Fuel”, but you are not sure what is this X factor that will ensure future profitability and customer loyalty? Your future C-stores should be more than just a service station shop, but you are struggling with how to integrate and manage new and third-party offerings and how to enable modern customer journeys? You offer electric vehicle charging but you are still looking for ways to stand up to the growing competition and especially new players coming from grocery, restaurant, hotel and other businesses? It’s time to visit the Diebold Nixdorf booth at UNITI expo!**

From May 17th to May 19th, Diebold Nixdorf will present their solution portfolio at UNITI expo in Stuttgart, the leading European trade fair for the retail petroleum and car wash industries in hall number 5 (booth #A07).

“With its conference program and the compact three-day format, it is specially tailored to the needs

of the industry”, says Nino Hoerttrich, Head of Retail Industry Marketing at Diebold Nixdorf. “After two years of absence, UNITI expo provides a unique opportunity for exhibitors and visitors to build and strengthen business relationships. It’s the perfect place to meet our customers again!”

Here are some of Diebold Nixdorf’s booth highlights:

- **Advanced self-service solutions and traditional checkout journeys:**

Tailored for the needs of a fast-moving environment of a C-Store or Fuel Station, the state-of-the-art checkout journeys are supporting self-service and traditional checkout in the same way. Customers can experience Diebold Nixdorf’s new DN Series™ EASY family to enhance self-service processes or the DN Series BEETLE product family to be future ready with the traditional checkout solution of tomorrow.

- **Vynamic® Retail Platform:**

With the launch of the new cloud-based software portfolio for retail, Diebold Nixdorf will demo the latest industry package FCx at the show. FCx is the tailor-made solution for the Fuel & Convenience industry, what allows customers to integrate and run a cloud-based software solution in their locations.

- **Managed Services & EV Charging:**

Diebold Nixdorf’s Advanced Managed Services portfolio offers real-time monitoring of multiple retailer touchpoints. As an addition to the traditional managed services offering, for traditional touchpoints like Self-Checkouts or POS but also for upcoming technologies like EV Charging stations, Diebold Nixdorf has the capabilities to manage all relevant interaction points in the store.
