

PSD Codax acquired by Innovative Control Systems

Innovative Control Systems (ICS), a provider of car wash management and control system technologies, has acquired PSD Codax, a UK-based leader in car wash code entry and access control systems.

ICS will continue to operate PSD Codax from their current office in Bristol, UK giving the combined customer bases full technological support through a global network of call centres.

"The geographic coverage and product lines are complementary. We are confident that the synergies created will offer significant benefits for customers around the world," said Kevin Detrick, Innovative Control Systems President.

PSD Codax designs, manufactures, and supports a full range of products for the car wash and forecourt car care equipment industry.

"The opportunities for global synergy are immense. PSD Codax serves thousands of retail car wash and forecourt sites around the world. ICS products complement our own. Coming together with ICS will move Codax into a new phase of business development," said Graham Round, Sales Director for PSD Codax.

Headquartered in Wind Gap, Pennsylvania, USA, ICS is a leading provider of car wash management and control systems.
