

Fairbanks Environmental acquired by OPW

OPW has announced the acquisition of Fairbanks Environmental, a global provider of fuel management services to the retail and commercial fueling industry.

The acquisition of Fairbanks will expand OPW's end-to-end solutions with complete fuel monitoring and data analysis, according to David Crouse, President of OPW.

"By providing this additional capability, we can help customers detect and eliminate fuel loss, reduce operating costs, improve profitability and meet environmental and regulatory requirements. Protecting people and the environment is a key tenet for OPW, and we can further support that mission with the addition of Fairbanks," said Crouse.

Fairbanks uses the power of real-time data to reduce fuel losses, lower operational costs and improve margins for fuel retailers. It is present in 35 countries and serves over 13,000 fuel stations.

"Today's announcement is an important milestone for Fairbanks as we join forces with OPW, a major brand name within the industry. This union promises an exciting future as we embark on the next stage of the Fairbanks journey," said Steve Jones, one of Fairbanks' founding members

OPW is a global leader in fluid-handling solutions and a business unit within Dover's Fluids segment.
