

Retail's Best announces new technology partner for events

Retail's Best announces Orbis Tech as the exclusive EPoS (Electronic Point of Sale) partner at the next series of industry events.

Retail's Best Forecourt & Convenience Partners, the networking event founded by convenience store and forecourt site operator Moiz Vas, will introduce technology provider Orbis Tech to retailers and petrol dealers at the event on 23 March 2017, organised by retailers for retailers.

The software provider is a rapidly growing name in international technology in the retail, forecourt and hospitality sectors and will be participating for the first time, according to Retail's Best.

"I'm absolutely thrilled that OrbisTech will be joining us for the first time in 2017, bringing their industry-leading expertise to our event and all our retail operators," says Moiz Vas, founder of Retail's Best.

OrbisTech, in their global joint venture with Invenco, have British supermarkets (Tesco and Asda UK) as well as international forecourt operators (BP, Exxon Mobil, Esso) as some of their major customers.

"Convenience and forecourt technology is evolving rapidly, and our event next March will be a great opportunity for those attending to hear and see what's brand new in the market - helping them stay ahead of the game," said Vas.

Retail's Best Forecourt & Convenience Partners will be held on 23 March at Chateau Impney, Worcestershire (United Kingdom).
