

Scheidt & Bachmann now available in Mexico

Products and services of Germany-based system vendor, Scheidt & Bachmann, will now be offered in Mexico. This comes after it entered into a partnership with Mexican distributor of control systems and automatic pay stations, Autosistemas Inteligentes.

Autosistemas Inteligentes, according to a company release, will now offer Scheidt & Bachmann's solutions to parking facilities operators in Mexico. AutoSistemas business segments include airports, company buildings, universities, hospitals and restaurants.

Scheidt & Bachmann sees Mexico as a very promising market. Scheidt & Bachmann is looking to exploit the great potential of the market and to expand it further - not only through the partnership with AutoSistemas which we are greatly looking forward to, but also by participating at Intertraffic 2017 in Mexico," says Martin Kammler, Managing Director of Scheidt & Bachmann GmbH.
