

## Arabian Gulf's largest natgas station to rise in Abu Dhabi

**The recently inaugurated service station in the Mahawi area on the Abu Dhabi - Al Ain highway will soon supply 2,850 cubic meters of compressed natural gas (CNG) per hour, making it the largest natural gas for vehicles (NGV) service station in the Arabian Gulf.**

The new station, operated by ADNOC Distribution, currently offers E-Plus 91 fuel, special 95, Super 98, and Green Diesel.

It also offers facilities and services including oil change, manual and automatic car wash, an LPG cylinder depot, an ADNOC Oasis convenience store, two fast food outlets, a Starbucks coffee shop and a mosque, according to a company release.

"The provision of infrastructure that will encourage the spread of clean energy vehicles, particularly compressed natural gas, is one of the key elements of ADNOC's distribution strategy to support Abu Dhabi's efforts to reduce carbon emissions for vehicles," said Saeed Mubarak Al Rashdi, Acting Chief Executive Officer of ADNOC Distribution.
