

## USA: Love's Travel Stops to include truck oil changing

**Love's Truck Tire Care locations nationwide continue to add services for professional truck drivers.**

Since introducing the concept with a focus on tires in 2008, Love's Truck Tire Care has developed into a full-service maintenance operation. Diesel oil changes are the latest addition to their offering and will be available at more than 130 locations.

"By offering preventative oil change services for professional drivers, we are providing them with helpful maintenance while they're already stopped for a meal or a break," said Dan Jensen, director of tire sales and services for Love's.

Love's has more than 270 Love's Truck Tire Care facilities. The majority of locations are expected to be oil-change ready by the beginning of 2018.

The U.S. Bureau of Labor and Statistics says the demand for diesel service technicians and mechanics is rapidly growing as more freight is shipped across the country, leading to more diesel trucks on roadways.
