

Dover Fueling Solutions appoints new Managing Director of Europe, Middle East and Africa

Dover Fueling Solutions (“DFS”) has announced the appointment of Jeroen de Gruijter to the role of Managing Director of Europe, Middle East and Africa (EMEA).

In this new role as Managing Director EMEA, Jeroen de Gruijter will report directly to David Crouse, the President of DFS, and will be based in the DFS manufacturing center in Dundee, Scotland.

This appointment comes at a time when DFS is gaining momentum in the industry, uniting brands such as Tokheim, Wayne Fueling Systems, Fairbanks, ProGauge and OPW FMS, which were recently brought together to create the DFS business in December 2016.

A mechanical engineer, de Gruijter joins DFS from Xylem, a water equipment manufacturer, where he served as Managing Director for Europe, Middle East, India and Africa.

“Dover Fueling Solutions is comprised of many of the leading brands in the fuel retail market, and our goal is to build upon and leverage that strong position,” noted de Gruijter. “We will continue to operate the DFS brands as ‘business as usual’ while aligning the organization’s efforts and resources to ensure that we enhance business performance and better serve our customers.”

DFS is a Dover company who delivers advanced fuel dispensing equipment, electronic systems and payment, fleet systems, automatic tank gauging and wetstock management
