## Oil and gas professionals discuss the industry at ADIPEC 2017

**ADIPEC brings together over 10,000 industry professionals, thought leaders and technical experts to drive oil and gas industry agenda.**

Transformation, diversification and evolution will be top keywords at the world's leading annual conference for oil and gas professionals, the Abu Dhabi International Petroleum Exhibition and Conference (ADIPEC).

ADIPEC is renowned as a global hub for knowledge exchange in the hydrocarbon business, with its landmark technical conference organised by the Society of Petroleum Engineers (SPE).

Eight Technical Industry Panel Sessions will also offer fresh insights into some of the big-picture operational challenges that oil and gas professionals face today, while a further six technical sessions will focus on the downstream sector.

"There is no doubt that the energy landscape is changing very quickly, but it is important to understand that conventional oil and gas will continue to have a very significant role," said Ali Khalifa

Al Shamsi.

ADIPEC will be held at Abu Dhabi National Exhibition Centre from 13 to 16 November 2017.
