

USA: Wildco-PES becomes Leighton O'Brien's newest fuel cleaning distributor

Leighton O'Brien (LOB) has signed a deal with Wildco for the distribution of its patented fuel cleaning and polishing services.

In April, Wildco-PES will start distributing LOB's fuel cleaning and polishing systems to its clients in the Northeast region of the US through its four branches: New Hampshire, Connecticut, Massachusetts and New Jersey.

Wildco-PES is a leader in the UST equipment sales, inspection, compliance, testing and construction management while Leighton O'Brien is a global tank and fuel management company based in Australia.

"Through this partnership, we can expand our presence and enhance our services portfolio by leveraging Leighton O'Brien's market-leading technologies," said Adam Desfosses, President of Wildco-PES.

The U.S. has become LOB's largest fuel cleaning and polishing market over the last three years.

LOB CEO, Reed Leighton said, "With our US fuel cleaning distributor growth, Leighton O'Brien US will clean more than 2,000 tanks in 2018. Leighton O'Brien has the only true nationwide network of PEI fuel cleaning distributors. Our patented systems are designed in Australia and built in the US."
