

Spain: Iberdrola and AVIA to install EV chargers at petrol stations

The two companies will invest around €1.35 million in the installation of 27 electric vehicle rapid chargers at AVIA stations.

Energy provider Iberdrola and fuel retailers AVIA have signed a cooperation agreement to boost electric mobility in Spain through the installation of rapid chargers in service stations around the country.

For the first roll-out, consisting of 27 EV chargers, both companies will invest around €1.35 million.

During an event in AVIA's head-office in San Sebastián, Raquel Balnco, director of Smart Solutions at Iberdrola, and Kepa Etxebarri, Deputy General Manager at AVIA, signed the deal to improve charging infrastructure across service stations in Spain.

AVIA is one of the leading fuel retailers in the country with some 180 gas stations.
