

Gilbarco Concentrates its Automation Solutions at Orpak in Partnership with DOMS

Orpak Systems is a leading solution and service provider for retail gas stations and commercial fleets, and is part of the GVR group as of last summer. Following the acquisition, Gilbarco Veeder-Root decided to concentrate its global automation development business at Orpak. As part of this strategic decision to combine resources under one business unit, DOMS - GVR's forecourt automation business - is now part of the Orpak center of excellence, and the joint solution will become GVR's unified global automation solution.

The DOMS group is a leading global provider of forecourt controllers (FCC) for gas stations, with its highly successful PSS 5000 installed at more than 80,000 sites in over 75 countries around the world. The PSS 5000 is sold through DOMS POS partners, Gilbarco sales teams and global distributors.

Recently, DOMS released its newest upgrade of the PSS Forecourt Controller based on the CBP539 platform. This upgrade is bundled with Orpak's retail fuel site management software, LIGO, which

provides a full Back Office (BOS), a fuel Point-of-Sale (POS) functionality, as well as a reporting system and a fuel site management portal.

The powerful combination of PSS 5000, LIGO, and Orpak's flexible forecourt terminal product line provides a full end-to-end forecourt management solution for retail fuel sites without C-Stores.

"For many years, DOMS has provided its customers with its highly robust PSS 5000 forecourt controller. Now, with the new CPB539 it can host Orpak's LIGO and other applications as well, connect to cloud services, and offer improved remote access," said Tom Hvid, Engineering Manager at DOMS. "We are happy to bring the strong DOMS brand to Orpak and to contribute to the global automation group with our knowledge and expertise. Our R&D teams will continue to work on additional products and developments and we look forward to the many opportunities that lay ahead of us

"Gilbarco Veeder-Root remains fully committed to continue supporting its customers, POS partners and system integrators all around the world. PSS 5000 business model as POS-agnostic controller will remain, providing oil companies the IT & equipment the flexibility they need" added Morten Raaby, Insite360 & DOMS Director, Gilbarco Europe. "We are very pleased with the release of the new PSS controller that will allow connecting the station to WSM (Wet Stock Management) and other cloud services, creating more value to our customers."

Gil Himelman, VP Business Development at Orpak Systems, commented: "Having made this significant step, Gilbarco brings its global automation business under one platform. We can offer great opportunities and solution upgrades for existing and future customers with the LIGO retail station management software and other added value modules, such as the Retail Head Office (RHO) and Wet Stock Management (WSM), to the already deployed DOMS PSS 5000. We have great confidence in the DOMS and Orpak development teams and we anticipate a long and rewarding partnership".

About DOMS

DOMS is a leading global provider of forecourt controllers based in Denmark, founded in 1958 and became part of the Danish C.W. Obel Group in 1996, and joined the Gilbarco Veeder-Root family through acquisition in 2003. As part of Gilbarco Veeder-Root, DOMS operates as an independent and separate business unit.

About Orpak

Orpak Systems delivers comprehensive solutions to oil companies and commercial fleets, improving profitability and optimizing performance from the forecourt to the head office. The company's hardware, software and services enhance the entire retail fuel network and fleet management value chains, be it the single fuel transaction, retail network optimization or business analytics. Orpak has a 25-year track record of success and innovation. Known for rapid deployment of large end-to-end projects, its field-proven products are installed in more than 35,000 service stations and over 7 million vehicles across 60 countries. Orpak solutions are distributed via an international network of subsidiaries and value-added partners. In 2017, Orpak joined Fortive as part of the Gilbarco Veeder-

Root group. For more information, contact the company through the form in the Supplier profile below.
