

## DFS facility in Dundee highest ISO healthy & safety certification

**Dover Fueling Solutions' Dundee facility awarded the highest ISO occupational health & safety certification.**

Dover Fueling Solutions (DFS) has been awarded the International Organization for Standardization (ISO) 45001:2018 Occupational Health and Safety System (OHS) standard for their manufacturing facility in Dundee, United Kingdom.

The recently released ISO 45001:2018 OHS, the successor to OHSAS 18001 (Occupational Health and Safety Assessment Series), is an internationally recognized standard which requires organizations to identify, manage and strictly control health and safety risks in their workplace, and create better and safer working conditions for their employees.

"This is a fantastic achievement which would not be possible without sheer dedication and significant effort of the entire team at the Dundee facility, and their drive to create a safe, healthy and risk-free working environment," Jeroen de Gruijter, Managing Director EMEA for DFS.

The manufacturing facility in Dundee, which is also ISO 9001, ISO 14001 and ISO 50001 certified, is the largest DFS plant in Europe, Middle East and Africa.
