

## Ecology System offering Tanknology services in Italy

**Tanknology Inc., the world's largest provider of environmental compliance testing and inspection services, announced today the transfer of the Italian international license to Ecology System.**

Ecology System, based in Mantova (Mantua), Italy acquired the Tanknology license from Tanknology di Olson Rodney in late 2017, following Rod Olson's retirement. Ecology System will continue to offer the many services introduced under Tanknology di Olson Rodney, including VacuTect® tank tightness testing, TLD-1TM line tightness testing, LDT-5000 TM leak detector testing, TankCam® visual inspections, and also offer fuel polishing services for diesel fuel, tank cleaning, and aboveground storage tank compliance services. Though under new management, their field technicians have established expertise and over 20 years of experience with the technologies.

*"We are confident that Ecology System will build upon Tanknology di Olson Rodney's eighteen-plus years of success in Italy, both in the commercial and non-retail fueling sectors," stated Megan Stewart, a Tanknology International Manager. "Ecology System is innovative, dedicated, and an exceptional partner for Tanknology's tank testing and inspection services."*

Ecology System was founded in 2002 with a goal of offering environmental services to meet the ever-increasing needs of the industrial waste management and treatment sector. They have numerous certifications, including ISO 9001, ISO 14001, and are listed on the Register of Environmental Managers Category 8- Class B, Category 4-Class B, and Category 9-Class D. They also offer services for asbestos remediation, chemical sampling, civil waste management, and mobile sludge dehydration. Ecology System employs 30 staff members, supported by 150 qualified suppliers, serving over 230 active customers – and continues to grow.

*"Our goal is to grow the Tanknology services in Italy and beyond, which today represent the best*

*standard in the safety of tanks worldwide,” commented Nicola Federici, Director of Ecology System. “Our strength lies in our values: Responsibility, Reliability, and Excellence, but above all in the people of Ecology System, who, with their constant commitment, identify our group as a guarantee of safety, quality, and punctuality, in compliance with current environmental regulations through continuous training and updates in the search for innovative solutions.”*

Ecology System will exhibit at the upcoming [Oil & NonOil Trade Fair](#) in Verona, Italy October 9-11, 2018. You can visit them in Pavillion 6, Stand D6.1.

That same week, October 8-10, you can find Tanknology Inc. at [PEI at the NACS Show](#) in Las Vegas, Nevada, Booth #6953.
