

Esso card grows UK fuel station network

WEX Europe Services expands acceptance of Esso Card in the United Kingdom.

Leading fuel card provider, WEX Europe Services, is adding to its extensive Esso Card acceptance network in the UK to include more than 110 forecourts by the end of 2018. The expansion will provide customers with more choice and availability of filling stations throughout the country.

One of the UK's growing fuel card networks, Esso Card is increasing the number of fuel stations in its portfolio by more than 8%. The additional locations will provide improved service for fleets across the UK, with increased coverage around some of the major urban centres, including Birmingham and London, as well as the rest of the country.

"We're pleased to announce the expansion of our UK network as part of our ongoing commitment to offer one of the best fuel network acceptances in the country," comments Peter Dore, Commercial & Marketing Director at WEX Europe Services.

Since the acquisition of the Esso Card portfolio, drivers have access to more than 12,000 fuel stations throughout Europe.
