

Moore Oil signs three-year agreement with Dover Fueling Solutions

Dover Fueling Solutions (DFS) has entered into an agreement to provide wetstock management services to Moore Oil Company, headquartered in Birmingham, Alabama.

Moore Oil Company signed a three-year contract to receive the ClearView solution powered by Dover Fueling Solutions, with the aim of helping the business increase operational efficiencies. Through careful monitoring of fuel inventory, the ClearView solution is able to help automate many of the manual processes. The solution will also provide a real-time overview of any existing issues to Moore Oil Company's operations team.

Moore Oil Company was founded in 1954 and is family-owned and operated. It is the largest light products jobbership in Alabama, supplying fuel to some of the Southeast's largest commercial and industrial companies, as well as many small, privately-owned companies and individuals.

"We are confident that the ClearView solution will provide a level of automation to many of the manual processes that currently prevent our staff from spending time on more productive and profitable tasks," said Rocky Neason, Operations Manager of Moore Oil Company.
