

UK: Certas Energy joins the Northern Powerhouse to fuel regional growth

Certas Energy has become an official partner of the Northern Powerhouse - a government initiative which brings together businesses from across the North of England and Wales to realise the strong economic potential of the region.

As one of the UK's leading independent supplier of fuels and lubricants to commercial and domestic customers, Certas Energy has joined the partnership to support improvements in fuel efficiency, transportation and air quality in the North.

Headquartered in Warrington, Cheshire, the company fuels over 12,000 local businesses each year - employing over 500 people, operating in over 20 depots, 259 fuel stations and retail outlets and five bunker sites in the North alone.

"We are extremely proud to be an official partner of the Northern Powerhouse, demonstrating our commitment to providing innovative alternatives to traditional fuel supply and management solutions that support improvements in efficiency and productivity," said Brian Worrall, Director of Corporate Affairs at Certas Energy.

Certas Energy joins over 170 businesses and organisations who have already signed up to the Partner Programme based on their belief in the economic potential of the North.

As part of its drive to encourage the adoption of smarter fuel solutions, Certas Energy has been pioneering the use of a cleaner burning alternative to diesel, as exclusive UK distributor of Shell GTL Fuel.
