

DOE - US Department of Energy

The Office of Management (MA) is the Department of Energy's central management organization providing leadership in such mission critical areas as project and acquisition management. In addition, MA manages the Department's Headquarters complex and provides administrative support to employees in the Washington, DC area.

Ingrid Kolb, as the Director of the Office of Management, oversees more than \$22 billion in annual contract obligations and \$2 billion in financial assistance obligations and is responsible for management of the Department's multi-billion dollar project portfolio.

The Department of Energy has one of the richest and most diverse histories in the Federal Government. Although only in existence since 1977, the Department traces its lineage to the Manhattan Project effort to develop the atomic bomb during World War II and to the various energy-related programs that previously had been dispersed throughout various Federal agencies.
