Clean Fuels Ohio

Clean Fuels Ohio is a state-wide, non-profit organization dedicated to improving air quality and health, reducing environmental pollution, strengthening Ohio’s economy, and enhancing our nation's energy security by promoting and encouraging the use of cleaner, domestic fuels and efficient vehicles. As a U.S. Department of Energy Clean Cities coalition, Clean Fuels Ohio has remained the “go-to” resource for assistance with implementing alternative transportation solutions.

We have over a decade of extensive experience working with fleets and stakeholders to deploy cleaner, more efficient vehicles, advanced technologies, and nonpetroleum fuels and infrastructure throughout the state. Headquartered in Columbus, Ohio, we work extensively around the state in collaboration with local partners in the transportation industry, local and state government, and the general public.
