

Interstate Oil and Gas Compact Commission

The Interstate Oil and Gas Compact Commission is a multi-state government agency that is passionate about advancing the quality of life for all Americans. However, without energy, the quality of life we enjoy today would not exist. That's why the Commission works to ensure our nation's oil and natural gas resources are conserved and maximized while protecting health, safety and the environment.

It's no secret that American energy is the most valuable to our nation. The responsible development of our own resources not only strengthens our economy by creating and maintaining jobs, but also lessens our dependence on foreign resources, making oil and natural gas more affordable for consumers.

The IOGCC advocates for environmentally-sound ways to increase the supply of American energy. We accomplish this by providing governors of member states with a clear and unified voice to Congress, while also serving as the authority on issues surrounding these vital resources.

The Commission also assists states in balancing a multitude of interests through sound regulatory practices. Our unique structure offers a highly effective forum for states, industry, Congress and the environmental community to share information and viewpoints to advance our nation's energy future. We stand dedicated to securing resources needed to ensure our nation's energy, economic and national security.
