

## Renewable Industries Canada

Renewable Industries Canada, founded in 1984 as the Canadian Renewable Fuels Association, has grown to represent the leaders of Canada's bioeconomy – producers of renewable fuels and value added products that reduce GHG emissions and provide economic opportunity to the benefit of all Canadians.

Members of Renewable Industries Canada provide the public with renewable, clean-burning biofuels such as ethanol and Biodiesel – fuels that help fight climate change and combat pollution and smog. At the same time, they produce value added products from renewable resources and continuously innovate to provide even greater environmental and economic benefits.

### Our Members

Renewable Industries Canada is the only national voice for Canada's renewable fuels and bio-based products industries. We represent the full spectrum of the domestic biofuels value-chain.

Our members include:

- Grain and cellulose ethanol producers
- Biodiesel and renewable diesel producers
- Fuel technology providers
- Feedstock suppliers
- And many others
