

Robotanks

Robotanks LLC is one of the leading manufacturers of container gas stations, underground and ground tanks and containers. Our tanks and filling stations are used for storage of fuel and lubricants (diesel and biodiesel, gasoline, kerosene, ethanol, bioethanol), as well as liquids from the chemical and food industries.

The Robotanks design bureau's experts are able to project unique solutions for even the most specific tasks (taking into account operational loads, climatic conditions of the place for station's location, etc.). Own production implements projects of any complexity within the stipulated deadlines.
