

Resnova srl

AdBlue® by BASF is the only product produced exclusively from a hot melt dedicated urea process.

The only one that guarantees the full compatibility with the SCR after treatment system. AdBlue® by BASF is the product chosen by the main diesel engine manufacturers, truck manufacturers, agricultural and construction machines manufacturers, car manufacturers and it is available on the petrol stations of the major oil companies. AdBlue® by BASF is constantly monitored in order to assure quality at every stage of production and distribution according to the VDA and ISO 22241 standards.

Each production lot has its chemical analysis certificate: **The customer knows exactly what he has bought!**

A complete logistic chain that puts quality on top. Every product is provided with:

- Chemical analysis certificate
- Complete traceability (batch number)
- Anti-counterfeit labels
- Numbered seals

Resnova has been the official distributor of AdBlue® by BASF since 2004.

Resnova is the global partner of main truck and agricultural machine OEMs and OESs and is the supplier of the first filling for their production lines. Partnering with the main oil companies in the world Resnova is present with a wide spread network in many countries. With its global presence Resnova is able to supply any customer around the world with celerity, always guarantees the high product quality standards.

Meeting new emission standards faster with AdBlue® by BASF.

The new emission regulation for diesel engines, both for mobile and stationary applications, have been in force in Europe since 2006 with Euro 4, Euro 5 and recently Euro 6 exhaust gas standards respectively. Emission regulation is rapidly expanding worldwide and by 2020 most likely it will become compulsory globally except a few countries.

Today all truck and agricultural machine manufacturers produce engines respecting the emission limit thanks to the innovative SCR after treatment technology in combination with the AdBlue® reducing agent. Also Euro 6 car engines require AdBlue® in order to comply with the regulation.

Equipment & services

- Air, Water, Oil & Service Units
- DEF & AdBlue Equipment
- Environmental Protection Systems
- Pumps, Dispensers & Components
- Shop Equipment & Furniture
- Tank Truck & Transportation Equipment
- Tanks & Pipes
- Business Management, Consulting, Marketing & Financial Services
- Environmental services
- Fuel, CNG, LNG, LPG Management & Dispensing Services
- Supply of Non-Food Products for C-Stores
