## H2 Energy srl

The heart of H2 ENERGY srl is a team of experts, committed to the excellence and innovation on hydrogen technologies. With an active department of R&D, H2 ENERGY srl is focused on the development and construction of reliable, high efficiency, high purity and high-pressure AEM electrolyzers.

With over 20 years of experience it always delivered state of the art systems. Its roots lie in the development of AWL electrolyzers, in the recent past it deepened its involvement in PEM-electrolyzers and is now willing to focus its future on the promising AEM technology. It therefore has a product portfolio that covers:

- AWL, PEM and AEM electrolysis systems from laboratory scale up to multi-MW design
- High Temperature and Pressure electrolysis
- SOEC Proton-Conducting Ceramic Electrolytes, to operating at 500°C
- AWL-High Temperature&Pressure, to operating at 200÷350°C

Its diversified product and technology portfolio is suited for a variety of applications such as: backup power, mobility, energy storage and industrial applications.

### Categories

---

- CNG, LNG, LPG Equipment
- Construction
- Hydrogen Fueling
