

Glasdon International Limited

Glasdon have developed a range of innovative products to help keep your store front and forecourt looking their best and enhance your retail opportunities, including storage units, bins, and retail equipment. Constructed using high-quality materials including Durapol™ Material, all Glasdon products are long-lasting, low-maintenance and resistant to corrosion to withstand bad weather conditions.

To help keep areas litter free, we offer a huge selection of indoor and outdoor litter bins and recycling bins in a variety of sizes and styles to suit the smallest or largest of stores and petrol forecourts, most of which can be personalised with your brand name or logo.

The **Auto-Mate™ petrol forecourt bin** is a great addition to your petrol station which can be sited next to fuel pumps to offer easy-to-access paper towels, disposable gloves and a litter bin, all in one space-saving unit.

Advocate™ poster display sign is ideal for promoting your products or services. Its robust Durapol™ construction can withstand high winds and accidental knocks. The large display area can hold a 30(w) x 40(h)-inch poster which is ideal for forecourts as passing drivers can still see the sign.

The **Orion™ storage unit** is perfect for displaying products outside your store, it allows easy access to goods and encourages customers to buy. Three versions are available to suit the security needs of your site.

Glasdon International has an established network of distributors throughout the world, please don't hesitate to **contact us** to find your nearest distributor.
