

## Visive Group Limited

### **Leading global design and manufacturer of LED Border/Contour Solutions & Smart Technology**

Established in 2000, we developed a replacement for the neon cold cathode tube and the result was a robust, highly efficient LED Border / Contour tube solution called Hi-Lite™. Today, the Visive name is recognised as one of the leading global brands in LED border/contour solutions.

We combine our electronics expertise with mechanical, thermal and optical engineering experience to develop our LED Border/Contour solutions, providing our customers with innovative, quality, market leading products.

Our range of LED border / contour and wall-wash effect solutions provide customers, brands and architects with an array of vibrant colours for building facades, structures and Retail Virtual Merchandising displays.

Headquartered in Wrexham, UK, we design and manufacture our product for use around the globe. Visive Group (Guangzhou) in China was formed to meet the demands of the Asia market.

We provide exceptional customer service and can respond quickly to meet the needs of our customers and provide bespoke solutions anywhere in the world via our network of distribution partners. We build lasting relationships with brands and users of our products.

We have supplied over 400km of LED border / contour tube around the world for use on many globally recognised brands within retail outlets, leisure complexes, service stations, hotels and tower blocks.

Through our creative expertise we actively use LED to produce eye-catching solutions, bringing our customers' buildings and brands to life.
