

Retail Petroleum Solutions RPS

Having the headquarters in Istanbul, RPS provides end to end solution in fuel retailing, in-house fueling and B2B payment areas.

The needs of our clients are changing as the competition and mobility increase together with changing regulations of countries.

RPS brings high end solutions to fleet management, filling station operations and home-base fueling for commercial customers. Our goal is to exceed the expectations of all clients and make their life easier when managing their business. The most important value that we offer is flexibility in our systems. It is always possible to upgrade an existing system and to add on it new services in a very cost efficient way. Initial investment costs are competitive as well.

RPS is the company having the strongest RFID know-how in the world, in B2B fuel payment solutions. Unlike any other automation system providers, we give the opportunity to our clients not only to save and control, but also to sell more.

Our strongest product FuelMatic as a B2B Payment solution stands out as a new sales channel for our clients.

We do business with our partner companies in Middle-East countries, Asia and Africa. Our associates are distinguished by their functional and technical expertise combined with their hands-on experience. We ensure that the existing and future needs of our clients are deeply analyzed, so that we provide them the most effective and efficient solutions.

Our strategy is to build long term relations with our clients providing proactive maintenance and high quality after sales services, to contribute to their return on investment.

Our number one commitment to our clients is to provide end to end solutions for their existing and future needs using high end, flexible and secure systems.
