

3A Composites

Conveying corporate identity internally and externally is multi-faceted: ranging from façades, canopies and totems to interior design, store fittings and signage.

No matter how multi-faceted corporate architecture is, the challenge facing companies, and the architectural offices and design agencies they commission, is sustainable implementation. Communicating brand values and the associated lifestyle over an extended period of time and all around the world is corporate architecture's task. It must respond with holistic and integrative answers on ecological, economic and social questions.

Working closely with our customers, we have been dealing with these issues by offering a complete range of products for their CID-programme, from composite panels through to rigid sheet material.

ALUCOBOND®, ALUCOBOND®design, DIBOND®, DIBOND®design, FOREX®, SMART-X®, KAPA®, KAPA®tech, DISPA®, CRYLUX™ and LUMEX® stand for long-lasting colour fidelity and brilliance, excellent dimensional stability, easy processing and cost effectiveness. Giving you scope to implement your creative ideas.

3A Composites GmbH is part of the international 3A Composites Group. The group belongs to the listed company Schweiter Technologies headquartered in Steinhausen, Switzerland and has approx. 4'000 employees worldwide.
